

HemoCue – The Reference in Glucose Point-of-Care Testing

Respected for Accuracy.
Trusted for Diagnosis.

 HEMOCUE®

Because There's Never a Good Enough Reason to Compromise Patient Health

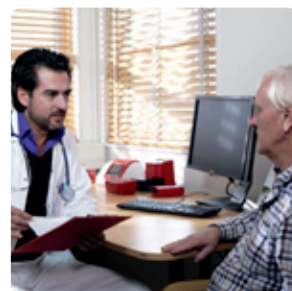

For over 30 years, our focus has been on accuracy in every detail – from ensuring minimal lot-to-lot variation to providing analyzers with fixed factory calibration. Others may settle for good enough. We never will. Because when it comes to caring for people, we refuse to compromise.

When Accuracy Matters

HemoCue glucose systems are hand-held spectrophotometers, developed for professional use, that deliver lab-accurate results. In fact, the results are so accurate they're approved for screening and diagnosing diabetes mellitus and gestational diabetes, and have been used in validations as reference for other methods.

Primary Care

Diabetes Care

When Minimizing Infection Risk Matters

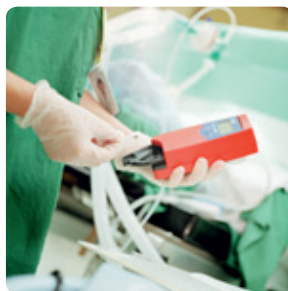

Our pioneering cuvette technology means the analyzer never has to be brought near the patient – significantly reducing the risk of spreading infection. Each disposable microcuvette is also individually wrapped to avoid contamination and to offer maximum shelflife.

Neonatal / Pediatric Care

When Efficient and Secure Workflow Matters

HemoCue's data management options improve patient safety by ensuring tests are performed by the right person for the right patient. You can set customizable automatic prompts for patient ID, operator ID, lot numbers, etc. Plus you have access to lockout functions.

Critical Care

Obstetrics & Gynecology

Take Advantage of Complete Solutions and Support

More than an excellent product, HemoCue offers personalized education and training and an unmatched service and support infrastructure to meet your needs and your patients'.

Products

The more right answers you have, the better care you can give your patients. In combination with other HemoCue tests such as HbA1c and urine albumin, you can build a complete point-of-care diabetes portfolio. With each analyzer factory calibrated, and no need for recalibration, you can count on accurate results.

Accuracy Starts With Us

Knowledge

A vital part of ensuring accurate results is giving healthcare professionals easy access to training and education. That's why we've poured over 30 years of experience and knowledge into our HemoCue Learning Center so you can have quick access to essential training and current best practices.

Knowledge Starts With Us

Service

We've built a stable infrastructure to ensure you have what you need when you need it. From our worldwide supply network to local representatives, along with our unmatched Customer Solutions Center, we provide support and delivery assurance.

Service Starts With Us

Because when it comes to caring for people, we refuse to compromise.
